There was a discussion about the frequency of meetings. There's going to be some discussion and changes about the meetings at the January meeting.

We had an extended discussion about remote operation. It was interesting to see how many different opinions and perspectives there are on one topic just within our small group. Everything from it wasn't considered to be "real" ham radio to "whatever trips their trigger". I think all opinions had their own merits, it just depended on how the remote operation was being used, i.e.; contesting, Dxing, etc...

### Ky QP

The last week of the month produced a very lively discussion on operating assisted vs unassisted. Again, very interesting opinions and perspectives on the multitude of options in this arena.

I want to remind everyone of the annual meeting in Lexington at Lizards Thicket on US1 on January 31, at 3pm. We will have elections/reelections, probably at vote on a couple of matters, gud food and company, and hope to see everyone if possible.
